Ag-En Plus Pvt. Ltd.

Let's Bring Innovation in Farming

With a mission statement “Let’s bring innovation in agriculture & farming “ We have ventured in the market to provide agro-tech solution ,greenhouse,rooftop farming, landless farming unit with the service then profit motive in 2012.Agriculture is the fundamental and integral part of every human beings and it has a significant relationship with all the animate and inanimate objects around the environment so its high time We adopt organic and gree tech in farming.

Let’s Get to Know us:

We take great pleasure to introduce our company “ Ag-En Plus Pvt. Ltd which has been established in 2012 with motive of bringing a new culture in agriculture farming which supports bio dynamic agriculture farming and blends the green technology and reach to the farmers who have been adversely affected due to not being able to select the best technology for the production, harvesting of vegetables be it tomatoes, capsicum.

We bring innoviate soutuion in greenhouse tunnel,drip irrigation , rooftop farming ,indoor and outdoor plantation.

Vegetable and Oxygen are the very fundamental and most crucial needs of human being so its high time we care for nature and produce our requirement with our own effort as well.

Biodynamic agriculture is a method of organic farming that emphasizes the holistic development and interrelationships of the soil, plants and animals as a self-sustaining system. One of the first modern ecological farming systems, it emphasizes a sustainable approach to agriculture.

It is explained that day by day, changing consumption pattern and habits in urban life for quality life is increasing significantly vegetable consumption which has led high demand. However, supply lag and chemical used situation of vegetable in market is found. Urban consumers have not much more choices, except purchasing high priced vegetables. so let’s do farming that supports our family, let’s use the space at rooftop,balcony and care for self and nature today.

“We strive to innovate technology that is eco-frienly and bring solution to organic and biodynamic farming .”

> Our Mission

AG-En Plus pvt ltd. has been bring New and Innovative Technology to provide solutino for organic farming and Urbani farming.

We aim to bring biodynamic agricultural system by applying technology which is environment friendly and production of vegetables is also high in optimized way. We deliver high class technology of dripping, tunneling, soil fertilization, bio dynamic farming technology.

>We Envision

WE STRIVE TO DISEMMINATE INFORMATION ON HOW TO GROW FOOD IN THE CITY, COMPOST THEIR WASTE AND TAKE CARE OF THEIR HOME LANDSCAPE IN AN ENVIRONMENTALLY RESPONSIBLE WAY

We aim to bring a consciousness in way of farming and enhance the self-employment in the agriculture to educated people applying to best technology for the production growth bearing in mind the health, ecological cycle in focus and we adopt technology friend. Why Us

OUR SYSTEM ARE MORE FLEXBIE TO SET UP AND IT CAN BE EASILY UTILIZED FOUR OUR INDOOR FARMING ,YARD FARMING AS WELL. IT HAS HIGH PRODUCTIVIT AND HEALTHY PRODUCTION AND WE FOCUS ON ENVIRONMENTAL FRIENDLY SYSTEM.

We aim to bring a consciousness in way of farming and enhance the self-employment in the agriculture to educated people applying to best technology for the production growth bearing in mind the health, ecological cycle in focus and we adopt technology friend. We endeavor to replace the pesticide and other inorganic farming by providing solution of organic Method of farming.

Since the beginning, trees have furnished us with two of life's essentials, food and oxygen. As we evolved, they provided additional necessities such as shelter, medicine, and tools. Today, their value continues to increase and more benefits of trees are being discovered as their role expands to satisfy the needs created by our modern lifestyles..

> *Why We Need Trees ?*

Trees are an important part of every community. Our streets, parks, playgrounds and backyards are lined with trees that create a peaceful, aesthetically pleasing environment. Trees increase our quality of life by bringing natural elements and wildlife habitats into urban settings. We gather under the cool shade they provide during outdoor activities with family and friends. Many neighborhoods are also the home of very old trees that serve as historic landmarks and a great source of town pride. Using trees in cities to deflect the sunlight reduces the heat island effect caused by pavement and commercial buildings.

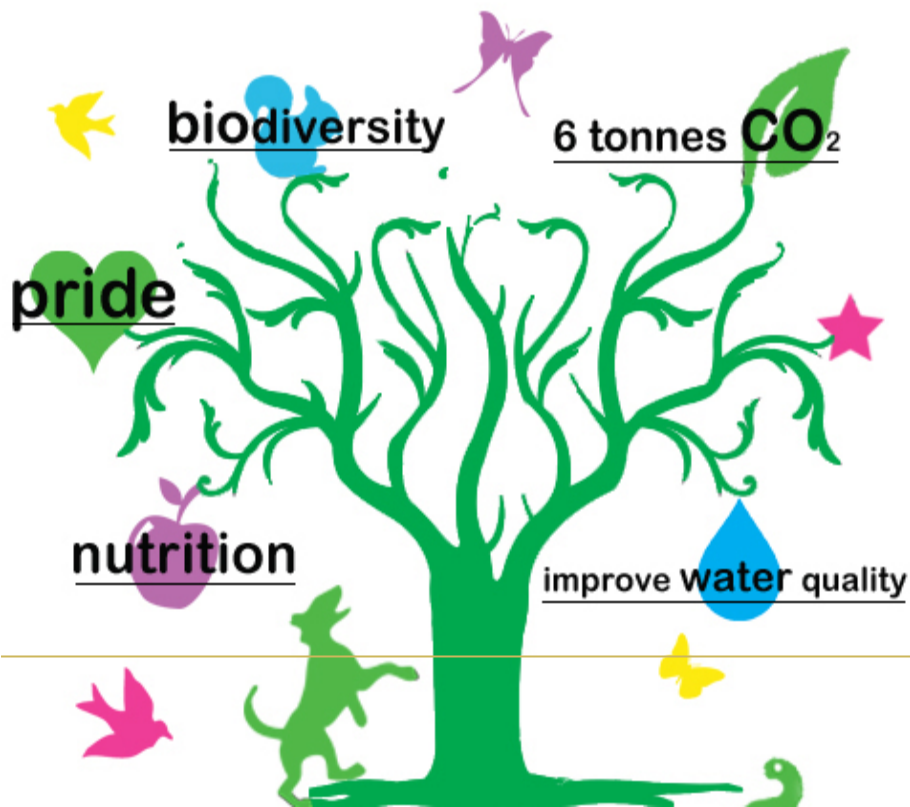

The main reason we like trees is because they are both beautiful and majestic. No two are alike. Different species display a seemingly endless variety of shapes, forms, textures and vibrant colors. Even individual trees vary their appearance throughout the course of the year as the seasons change. The strength, long lifespan and regal stature of trees give them a monument-like quality. Most of us react to the presence of trees with a pleasant, relaxed, comfortable feeling. In fact, many people plant trees as living memorials of life-changing events

Trees help record the history of your family as they grow and develop alongside you and your kids. We often make an emotional connection with trees we plant or become personally attached to the ones that we see every day. These strong bonds are evidenced by the hundreds of groups and organizations across the country that go to great lengths to protect and save particularly large or historic trees from the dangers of modern development. How many of your childhood memories include the trees in your backyard or

“We are not inheriting earth from our ancestor but burrowing from our children. Let's bring green life.”

Let's Plant two trees at home today!

IMPORTANCE OF TREES IN OUR LIFE

GREEN HOUSE

> Our Products :

Portable Greenhouse Tunnel

Rooftop Farming Unit

Vegetable Product Unit(VPU)

Drip Irrigation System

High Tunnel House

Indoor Ornamental /Decorative Plant Unit:

We have beautiful and elegant indoor planting vase unlike

Gamala it is not brittle and can be handle and moves easily and

it looks perfect for indoor decoration as well.

*"Our purpose is to help our clients and
our people realize their aspirations."*

Let's Produce Green and Fresh Vegetable at our Home

Our Expertise in Green House Tunnel :

We are notable organization in this domain, engaged in offering Greenhouse Consultancy Service regarding packaging problems for various industries. These Greenhouse Consultancy Services are rendered by our experienced professionals keeping in mind defined industry norms. Owing to high quality standards and reasonable price rates, our Greenhouse Consultancy Services are in demand across the world. Apart from this, these consultancy services are rendered in a hugely appreciable, timely, and a cost-effective manner.

“Our purpose is to help our clients and our people realize their aspirations.”

Let's Produce Green and Fresh Vegetable at our Home

Necessary Elements for Plants for Health Growing

Function of 3 Primary Elements

Nitrogen (N)

Basic component of proteins and chlorophyll (the pigment that gives plants their green colour). Plays an essential role in plant growth. Also feeds microorganisms in the soil.

Phosphorous (P)

Plays an important role in root growth and promotes the establishment of young plants, flowering, fruiting and ripening, photosynthesis, respiration and overall plant growth.

Potassium (K)

Moves through the plant. Promotes the movement of sugars, turgor and stem rigidity. Also increases the plant's overall resistance to cold, diseases, insect pests, etc. Promotes the formation of flower buds, the hardening-off of woody plants and fruiting.

Avocado

Green Apples

Green Grapes

Honeydew Melon

Kiwi

Limes

Green Pears

Artichokes

Arugula

Asparagus

Broccoli

Broccoli Rabe

Brussels Sprouts

Napa Cabbage

Green Beans

Cabbage

Celery

Cucumber

Belgian Endive

Kale
