What We Offer

Go Yard ,Grow an Oxygen at Yard

Let's grow urban forest in Kathmandu. As this city is fully turning into concrete building it is high time we seek solution to circumvent this serious problem. Let's plant a tree where we can and start today. Trees improve the community by making people feel calmer.

Vegetable Product Unit

With this VPU unit you can easily grow vegetable at rooftop, balcony or any open space of your house that can yield high productivity.

Portable Greenhouse Tunnel

We offer Greenhouse tunnel that is durable and portable and can be easily assembled with this technology. It can withstand high wind and pressure.

Drip Irrigation Unit

With Drip Irrigation the crops grow by double and grow healthily. It needs less water as well. We offer best technology DU.

Indoor/Outdoor Plant/Trees

Let's plant a tree at home to mark the beginning of green life. A small effort we have made can change a big in our Planet Earth.

Grow Vegetable at Rooftop

Yes if we can grow vegetable at our own home we can have fresh vegetable that are free from pesticide, chemicals and we will help environment remain green and healthy to live. Let's start today.

Portable Greenhouse Tunnel

Today's tunnel house are not so well designed and are not durable made up of bamboo and other improvised technology so let's bring bit of innovation that is long lasting, portable and can easily assembled. It yields high productivity as well.
